SUMMARY

I am a dedicated professional with a commitment to delivering quality results. With a strong background in frontend, I have also experienced in working with backend APIs and database. Seeking a role to synergize coding skills and enhance software development expertise.

SKILLS

Vue Nuxt Vuetify Vuex
JavaScript HTML CSS React
Node.Js SQL

PROJECTS

AndroHealth Solutions

Currently working on AndroHealth Solution,a health based solution built in Nuxt.Js. Responsible for implementing user interfaces and improving user experience in cutting edge health care application.

Pak Saf

Pak Saf is a web-based platform developed using Vue.js for the frontend and Node.js for the backend, designed to streamline waste collection and recycling processes. The platform connects users who want to dispose of recyclable waste with riders who collect it, ensuring proper waste management while incentivizing users with monetary rewards.

What's Cooking

Developed a comprehensive restaurant management system that streamlines operations, enhances customer service, and facilitates efficient management of a restaurant business.
